DD/ST# 1099-68

ADM-19-6

15 MAR 1968

Colonel P. G. Olenchuk
Commanding Officer, Fort Detrick
Frederick, Maryland

Through: Commanding General
          U. S. Army Materiel Command
          Building T-7
          Washington, D. C.

Dear Colonel Olenchuk:

     As part of a program directed toward the long-term development
of a group of carefully selected employees, the Directorate of
Science and Technology of the Central Intelligence Agency has initiated
a broad course of training, which will cover a seven-month period
to June 1968. For a thorough understanding of the biological warfare
field and in support of related intelligence analyses, we would like
to have this group visit Fort Detrick for briefings on BW research
and development activities. The briefings given to last year's
class by your Staff were outstanding. It is requested that the
group be briefed again on agent development, laboratory testing,
dissemination devices, protective vaccines, and unconventional
warfare applications.

     Based on our presently planned training schedule, we are proposing
Wednesday, 22 May 1968, as the date for this visit. Considering
travel time from Washington, D. C., we would expect an arrival time
of about 0900, so briefings could be scheduled to begin by 0930.
At the end of the day, the group would return by bus or cars to
Washington, D. C.

     The list of participants on this proposed trip is attached, and
Top Secret clearances will be forwarded through proper channels. Any
